

Dia Eagle

مصنع شركة نهر الجنوب لفلاتر غسيل الكلى
South Eagle Co. for Manufacturing Dialysis Filters

Our Vision

To ensure that the highest quality of renal products and care are available worldwide for those that are in need of it.

ABOUT US

Located in the western region of Saudi Arabia, this company emerged from the vision of its founder and Chairman to become an active force of national security and stability in providing quality products for the dialysis population of the region and worldwide.

Having decades of experience in various sectors of the medical industry, the DiaEagle team is dedicated to ensuring nothing less than the highest quality of products for the dialysis patient and beyond.

As the factory site comprises of 10,000m², it has been designated into two phases - of which phase I consumes 3,000m² - consisting of areas of the production lines, warehouse facilities and administrative offices.

Phase II, the area of which covers the remaining 7,000m² has been designated for future expansion of the company with additional production lines and warehousing facilities.

Phase I has already been implemented, machineries all commissioned and production has been activated - the products of which is a full line of hemodialyzers, consisting of 4 distinct models, each of which is offered in both high flux and low flux options.

Phase II has not yet been implemented - and studies are in process for optimizing the facility as well as staff (both administrative and operational) for facilitating the expansion to a specialty of production which would develop into a valued asset built upon the success of phase I.

Our Products

Our pioneer product line consists of 4 area sizes of dialyzers - 1.3, 1.5, 1.7 & 1.9, each in ranges of both Low Flux and High Flux.

Future developments of our production line and extensions of the existing production facility promise of diversity into other ranges, as well as various specialized varieties, as per the request of the clients.

QUALITY

Only the highest quality of medical grade raw materials and the PUREMA® membrane combined with our intense in-house quality supervision resulting in bio-compatible products.

INNOVATIVE DESIGN

Encompassing cutting edge technology of the industry - DiaEagle's dialyzers are promising of higher clearance levels and ultimate health benefits.

TARGET MARKET & STRATEGY

With the international market as well as domestic in mind, we address both private and government sectors alike.
